

6

STEPS FOR COCKROACH CONTROL

1

INSPECTION

Inspection is important. We learn to know where the pest infestation is at and identify the type of pest that is infesting in your home.

2

GEL BAIT

Gel Baiting is one of the most effective treatment. It works well with German Cockroach.

3

GRANULAR BAIT

Placing granular on a bait station is very effective for American Cockroach.

4

SPRAY

Spraying is mainly use at external area of your home

5

INDOOR MIST

If the infestation is too heavy, misting treatment will bring down the infestation before proceeding to control it.
